ABOUT US

Focused on Your Success in the Digital Economy

Rizeware Solutions is a global organization offering a comprehensive suite of software, hardware, and professional services capabilities to help businesses successfully implement their AI-powered Digital Transformation initiatives. To achieve this objective, we've partnered with Microsoft and IBM to ensure your business has the innovative solutions - including Copilot AI technologies - needed to help you reach your corporate goals.

The team at Rizeware Solutions are experts in information technologies. We have more than 20 years of experience working with clients and partners on hardware, software, and professional IT projects of all sizes. Today, we specialize in Digital Transformation by helping growing businesses optimize their IT infrastructures with the security defense, network performance, and software tools needed for them to be successful in today's digital economy.

Our IT projects are always backed by an unmatched commitment to customer satisfaction, helping to ensure a successful partnership.

OUR SOLUTIONS
——— What We Offer ———

Within the overall context of Digital Transformation, Rizeware Solutions partners with clients to focus on the specific priorities they need to address. Here are three examples of where we often start client engagements.

1) IT Readiness - We recommend to all clients that we first perform a detailed assessment of your current IT infrastructure. This is vitally important to ensure your network and cloud resources are properly configured and provisioned for optimal performance. Equally important, we analyze your cybersecurity architecture and identify areas where your business could be exposed to a targeted cyberattack.

2) Market Readiness - After the IT infrastructure has been optimized, we often implement CRM (Customer Relationship Management) software that is used to help businesses plan, implement, and measure marketing campaigns that will ultimately generate new customers and increased revenue. These tools, which include Microsoft Dynamics, will help you identify the specific profile of customer that is ideal for your product or service offering.

3) AI Readiness - With the right productivity tools in place, Rizeware can then train your team on how, where, and when to leverage the power of AI technologies like Microsoft Copilot. We can provide guidance and recommendations on the responsible use of AI, and specific use cases that can help your business automate tasks and accelerate productivity. We'll show you how to start slow with tactical use cases, then gradually leverage AI for more strategic initiatives.

CASE STUDIES

Bernheim Kelley Battista, LLC

BK LLC

REALJUSTICE.COM

In response to Bernheim Kelley's technology requirements, Rizeware Solutions developed AllRize, a Dynamics 365 CRM and case management system. This solution not only optimized BK's operations, but has evolved into an indispensable tool for law firms worldwide, facilitating efficient management of client cases, leads, contacts, and day-to-day legal operations.

Rizeware enabled Bernheim Kelley (BK) to attain the following benefits:

- Streamlined BK's day-to-day operations and assisted in internal quarterly business reviews.

- Enhanced attorney and staff efficiency through the integration of a scalable CRM, Case Management, and Accounting Solution.

- Strengthened cybersecurity preparedness and resilience, safeguarding every attorney with robust endpoint and device protection measures.

- Assumed strategic vCIO/CTO/CMO roles, orchestrating product and service implementation aligned with firm goals, both short-term and long-term.

- Optimized efficiency in case data management, scheduling, accounting integration, and device compatibility for seamless operations.

- Trained over 50 BK users in cybersecurity, support services, Rizeware customization.

CASE STUDIES
NtelSec, Inc.

NtelSec
A Velez Security Solutions Company

Working jointly with NtelSec, Rizeware Solutions ensured the success of their development team, meeting timelines alongside their Scrum Master. Leveraging our expertise in the Microsoft Power Platform, we prioritized creating advanced applications to streamline business processes and enhance user experiences.

As the vPM/Business Sponsor, our responsibilities included:

- Guided solutions design and development with Microsoft Power Platform, emphasizing Power Pages and Power Apps.

- Served as agile scrum team's technical lead, overseeing complex feature implementation and providing guidance to junior developers.

- Collaborated with cross-functional teams to ensure smooth project delivery.

- Coordinated with stakeholders and teams to gather requirements and provide accurate estimates.

- Engaged in all PI planning aspects: requirements, scheduling, work planning, tracking, risk analysis, stakeholder management, and reporting.

- Developed proof-of-concepts to validate potential solutions and mitigate technical risks.

CASE STUDIES

Rize Technologies

Rizeware Solutions implemented the AI-Processing Documents Module and developed advanced applications using Copilot | Azure AI-Studio for Rize Technologies. These solutions were designed to streamline business processes and deliver exceptional user experiences.

Key Solutions and Implementations for Rize Technologies:

Leveraged our deep expertise in Microsoft Copilot Platform to architect and develop top-tier solutions.

Utilized Document Intelligence Service and OCR tools to train a model with invoice image data.

Extracted total prices from invoices after training, assessing detection accuracy through confidence scores.

Utilized Microsoft Power Apps as the UI interface for uploading invoices.

Automated approval workflows based on extracted data.
