

Accelerate Your Career Growth

Get In-Depth Training on Microsoft Copilot!

Microsoft's powerful Copilot technology has become one of the most widely adopted artificial intelligence (AI) engines in the world, with an estimated 400 million users - and growing. Rizeware Solutions and PC Halle are pleased to offer you the opportunity to enhance your knowledge of Copilot and develop the skills you need to take advantage of this game-changing technology.

We encourage you to register now for this one-day, hands-on training event being offered exclusively to technical professionals and business leaders in Morocco.

What You'll Learn

- Master AI and Generative AI technologies: Understand the foundations of AI and its real-world applications.
- Leverage Microsoft Copilot for workflow optimization: Learn how to integrate AI into everyday business processes to boost efficiency.
- Hands-on experience with Copilot Studio: Build AI solutions using Topics, Nodes, and Build Types in Copilot Studio.
- Integrate APIs and Power FX to tap into external data sources: Create sophisticated workflows that improve both internal workflows and external processes.
- Improve customer experiences: Discover how AI can transform both internal and external interactions, driving better customer outcomes.

Why Choose Rizeware?

Rizeware Solutions, a partner of PC Halle, has gained extensive experience working with innovative technologies, providing business solutions that enable digital transformation, and delivering hands-on training to organizations worldwide. Through this experience, we've gained a deep understanding of how AI can be applied to solve real-world business challenges. We've successfully implemented AI-driven solutions for multiple industries, enabling businesses to:

- ✓ Automate processes to improve operational efficiency.
- ✓ Personalize customer interactions using intelligent systems.
- ✓ Streamline internal workflows with intelligent AI-driven decision-making.
- ✓ Build and integrate AI models that adapt to specific business needs.

Our approach combines technical expertise with practical business insights, ensuring that participants leave this training event with skills they can immediately apply in their organizations.
